

# LINDEN FABRICATING LTD.

## GENUINE, TOP QUALITY LINDEN PARTS

Reduce maintenance and improve efficiency with original spare parts machined to the correct profiles, tolerances and clearances to give a perfect fit the first time, every time.

Linden Fabricating is the Original Equipment Manufacturer of your Linden Step Feeder, Quadrant Feeder or Log Ladder

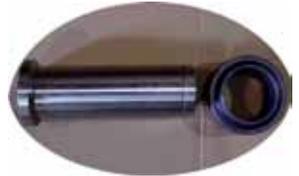

We have the original engineered drawings for every single part in your machine and we offer the fastest and most economical source for authentic first quality replacement parts that can add years of life to your equipment. This means that your parts will be manufactured to OEM specifications every time.

Our parts staff is an experienced and knowledgeable team with the goal of ensuring that our customers get exactly what they need when they need it. We understand the importance of getting you the right replacement parts right away. We have shelves full of the most common spare parts to ensure that most of the parts that you need are in inventory and we can ship the same day that the part is ordered. If we don't have the part in our inventory our highly skilled machine shop can quickly manufacture the right component that meets your needs.

Top quality is guaranteed with every product that we sell and you can count on receiving durable and reliable parts for your Linden equipment. Over the years, we have gained extensive knowledge on how our parts need to be designed and produced for optimum performance. We understand the impact that material type, tolerances, strength, heat treating, and plating have on the performance of a part. That is why a part purchased from Linden will last longer and perform better than the same part purchased from any other supplier.

Linden offers competitive prices along with top-notch customer service. Best of all, you can always feel confident that you'll always get exactly the part you're looking for.

When reliability and performance counts, rely on genuine Linden components for all your replacement parts needs.
